PROFILE

Fullstack Software Developer at Rain, working on the B2B portal — the platform Rain’s business customers use to buy and manage products in volume. I work across the stack: a Next.js 16 frontend and a Go API, with an OpenAPI contract between them.

Outside Rain I am the founder of ROGUETECHNOLOGIES (Pty) Ltd, a Cape Town web development studio, and the builder of Bookvas, its first product: a multi-tenant booking platform where clients pay a deposit to book, so small service businesses stop losing money to no-shows. I like owning a thing end to end: the schema, the API, the UI, the deploy, and the customer who uses it.

EXPERIENCE

Software Developer (Intermediate) · Rain 07/2026 – Present

- Fullstack developer on Rain’s B2B portal — the platform business customers use to buy and manage products in volume.
 - Work across both repos: the Next.js 16 App Router frontend and the stateless Go API.
 - Built the OpenAPI → TypeScript codegen pipeline so the frontend and Go backend share one contract.
 - Delivered product detail, top-up and cancellation flows end to end.
 - Produced a full codebase audit and interactive reference documentation for the team.
- Next.js 16 · TypeScript · Go · PostgreSQL · OpenAPI

Intermediate Frontend Developer & Feature Team Lead · Retro Rabbit / Smartek21 05/2025 – 07/2026

- Led one of several feature teams at a software development house, guiding developers on architecture, code quality and sprint delivery across client and internal projects.
 - Drove event-driven state management with NgRx SignalStore — Events, Reducers, Effects, Facade, Store.
 - Architected reusable high-performance UI components: advanced tables, dynamic filters, dropdowns, expansions.
 - Optimised frontend performance through lazy loading, bundle optimisation, change-detection tuning and state isolation.
 - Owned CI/CD in Azure DevOps — repositories, pull requests, automated testing, pipelines.
- Angular · NgRx SignalStore · Azure DevOps

Founder & CEO · ROGUETECHNOLOGIES (Pty) Ltd 2025 – Present

- Founded a Cape Town web development studio; registered as a Pty Ltd in 2026.
 - Shipped client work end to end — brand, site, domain, hosting, email.
 - Designed and built **Bookvas**, the studio’s own product: multi-tenant booking SaaS with PayFast deposits and split settlement, Spring Boot 4 on Cloud Run, Angular 21 frontends, Flyway-managed Postgres, cross-tenant isolation test suite.
- Strategy · Fullstack · Product

Intermediate Frontend Developer · Rain 07/2024 – 05/2025

- Built and maintained customer-facing and internal Angular applications, including the assisted-sales portal.
 - Applied NGXS state management to separate UI logic from domain logic.
 - Optimised bundle size, routing, lazy loading and change detection.
 - Integrated REST APIs with structured error handling, retry logic and optimistic UI updates.
- Angular · NGXS · SCSS

Angular Developer · Rain

01/2023 – 07/2024

- Crafted front-end UI designs using HTML5, SCSS, TypeScript, Angular, and Angular Material for responsive layouts.
- Implemented RxJS streams for asynchronous communication, elevating dynamic client-server interactions.
- Developed reusable, modular components, directives, and services to expedite feature development and maintain codebases.
- Managed code repositories with Git and GitLab, utilizing collaborative branching and merging strategies.

Angular · RxJS · Material

Junior Frontend Developer · Acumen / FiftyKnots

04/2022 – 09/2022

- Utilized C#, .NET Core, HTML, CSS, jQuery, and NopCommerce to deliver state-of-the-art solution updates.
- Specialized in customizing e-commerce systems, setting up payment processing configurations, and implementing third-party integrations.

C# · .NET Core · jQuery

Assistant Code Mentor · Project CodeX

01/2022 – 04/2022

- Guided aspiring developers towards coding proficiency via structured code reviews, pair programming, technical assistance, and actionable debugging feedback.

Mentorship · Java · Web

SELECTED WORK

Bookvas · Own product · Live

Deposit-secured online booking for South African service businesses. Clients pay a PayFast deposit to book; the money settles straight into the business owner's own merchant account. Multi-tenant Spring Boot 4 API on Cloud Run, Angular 21 tenant and admin apps, Flyway-managed Postgres, 24-test cross-tenant isolation suite.

Java 21 · Spring Boot 4 · Angular 21 · PostgreSQL · PayFast · Google Cloud

ROGUETECHNOLOGIES · Agency · Founder

rogue-tech.co.za

Cape Town web development studio — brand, site and service packages built end to end. "Your digital team. Built to grow with you."

Bruja Thembi · Client project · Live

brujathembi.com

First publicly deployed client project — a booking-led site with Cal.com integration, custom domain and branded email, shipped end to end.

STACK

Frontend	Next.js 16 · Angular 21 · TypeScript · React · NgRx SignalStore · NGXS · RxJS · Tailwind CSS · SCSS · Vitest
Backend & Data	Go · Java 21 / Spring Boot 4 · PostgreSQL · Flyway · REST / OpenAPI · C# .NET Core
Cloud & Tooling	Google Cloud Run · Cloud SQL · Secret Manager · Docker · GitHub Actions · Azure DevOps · Netlify · Git / GitLab
Payments & Integrations	PayFast · Cal.com · Brevo · Cloudflare Turnstile · Google Maps Platform

EDUCATION

Software Development (NQF Level 5) · Project CodeX

2022

Java Oracle SE8 Programmer (Oracle Certified Associate); Full Stack Web Developer training; Responsive Web Design; Agile methodologies.

National Senior Certificate · Isipingo Secondary School

2019
